

CURRICULUM VITAE OF VHUSANI LIBAGO

PERSONAL SUMMARY

I am a highly skilled Full Stack Software Developer with strong expertise in building scalable, high-performance web applications and marketplace platforms. My core stack includes .NET (7/8), Angular (17+), SQL Server, MySQL, PHP, T-SQL, JavaScript, HTML, and CSS.

- Beyond traditional development, I specialize in:
- Designing and building AI-enhanced e-commerce platforms
- Implementing Elasticsearch for advanced search, filtering, indexing, and NLP-driven recommendations
- Building RESTful APIs using .NET Web API with JWT and OAuth authentication
- Architecting multi-tenant authentication systems using IdentityServer4
- Implementing SSR (Server-Side Rendering) for Angular applications
- Automating background processes using Hangfire
- Designing scalable product indexing and search suggestion systems

I hold a Bachelor's Degree in Informatics and Technology Management and a Diploma in Software Development. I am passionate about building intelligent systems that improve business efficiency and enhance user experience. I thrive on solving complex technical challenges and continuously expanding my expertise in modern software architecture, AI driven solutions, and automation.

PERSONAL DETAILS

Surname	: Libago
First Names	: Vhusani
Gender	: Male
Nationality	: South African
Languages Spoken	: Tshivenda, English and Sesotho
Criminal Record	: None
License	: Code 8

CONTACT DETAILS

Residential Address	: 36 Melville Rd, Ottery East, Cape Town, 7800
Email	: vhusani.libago@gmail.com (Preferred contact method)
WhatsApp	: 0711160206

EDUCATION

Tertiary Education

Institution	: Mancosa (Pty) Ltd
Qualification	: BCom: Informatics and Technology Management
Modules	: Introduction to Business Management
	: Economics
	: Informatics
	: Analytical Techniques
	: Financial Reporting and Analysis
	: Information Technology Management
	: Management Accounting
	: Advanced Business Statistics
	: Information Systems
	: Principles of Project Management

	: Auditing
	: Systems Analysis and Design
	: Capstone Project
Year Completed	: 2023
Institution	: CTU training Solutions Stellenbosch (Pty) Ltd
Qualification	: MCSE: Business Intelligence, Diploma
Modules	: SQL Server 2014
	: Report Builder and SQL BI studio
	: Java Development
	: Android Development
	: SharePoint Server
	: Database development 1
	: Database development 2
	: Servers
	: Introduction to Project management
	: Change management.
Year Completed	: 2017
Qualification	: MCSD: Systems Development, NQF 5
Modules	: Business Communication Fundamentals
	: Computer Literacy
	: Windows 8.1
	: Introduction to gaming development
	: Introduction to Blend 2012
	: Experience with Visual Studio 2013 C# Programming
	: Developing apps using C#
	: HTML5, JavaScript and CSS3
	: ASP.NET with MVC
	: Windows Azure
	: Intro to SQL Server 2014
Year Completed	: 2015
<u>Secondary Education</u>	
School Attended	: Flora-park Comprehensive High School
Qualification	: National Senior Certificate
Highest Grade Passed	: Grade 12
Year	: 2014
<u>CERTIFICATIONS</u>	
MS® Certified Solutions Associate	: Web Applications
MS Certified Solutions Developer	: App Builder
	: Web Applications
	: Windows Store Apps Using C#
Microsoft Certified Professional	: Microsoft Certified Professional
Microsoft Specialist	: Programming in C#

EXPERIENCE

June 2023 – Current

Company	: Cash Crusaders Franchising
Occupation	: .Net Developer
Duties	: Write clean, efficient code following best practices. : Apply .NET best practices and solid OOP principles. : Write and test SQL scripts; design relational tables. : Use Git flow: commits, pull requests, merges, and deployments. : Review peer pull requests with fair, constructive feedback. : Prioritize and complete tasks based on Jira board. : Assist in release cycles; communicate progress clearly. : Attend and contribute to stand-ups and team meetings.

August 2022 – June 2023

Company	: Paysolutions
Occupation	: Full-stack Developer
Duties	: Developing front end website architecture : Designing user interactions on web pages. : Developing back-end website applications. : Ensuring cross-platform optimization for mobile phones. : Designing and developing APIs. : Meeting both technical and consumer needs.
Reason for leaving	: Career growth

July 2019 – July 2020

Company	: ITouch Messaging Services (Contract)
Occupation	: Junior Web / Product Developer
Duties	: Upgraded legacy web server software to modern standards. : Converted C/C++ websites to PHP for better maintainability. : Built secure, custom websites with clean design and easy navigation. : Developed custom scripts to improve interactivity and functionality. : Created web-based reporting and monitoring tools. : Planned and implemented full web application infrastructure (software & hardware).
Reason for leaving	: Contract expired.

September 2017 - September 2018

Company	: Streetlight Consult (Cape Town)
Occupation	: Junior Developer/Designer
Duties	: Design and build applications and custom projects using Microsoft SharePoint. : Follow development policies and procedures : Continuously acquire new knowledge
Reason for leaving	: Retrenchment

Skills	Years/Months of Experience	Last used
Windows	10 years	2026
Linux	4 years	2024
WHM	3 years	2022
cPanel	5 years	2026
Transact-SQL (T-SQL)	3 years	2026

PROJECTS

September 2020 – Current

Project Name

Thesouthmart Marketplace (In Progress)

Domains: <https://thesouthmart.co.za> | <https://dashboard.thesouthmart.co.za>

Description

Thesouthmart is a high-performance marketplace connecting local suppliers with buyers across South Africa. It features inventory management, smart search with Elasticsearch, and a responsive, scalable design. The platform is built with performance, reliability, and modern DevOps practices in mind.

Key Achievements & Responsibilities

- Architected and developed the full-stack platform using **.NET 7/8, Angular 17+, SQL Server, MySQL, PHP, T-SQL, and JavaScript/HTML/CSS**.
- Implemented **AI-driven search and product recommendations**, including NLP-enhanced suggestions and dynamic tagging for accurate product discovery.
- Designed **vendor and stock management systems**, empowering sellers to manage inventory, product listings, and store operations efficiently.
- Built a **responsive, high-performance frontend** capable of handling high traffic and complex product filtering.
- **Infrastructure & Deployment:**
 - Containerized the application using **Docker**, with separate containers for the frontend, backend, database, and background services.
 - Managed images through **private container registries**, ensuring versioned, reproducible builds.
 - Implemented **CI/CD pipelines on GitHub Actions**, automating builds, tests, and deployments from local development to production Linux servers.
 - Deployed and orchestrated containers on **Linux VPS**, handling zero-downtime updates and automated rollbacks.
- Continuously iterated on the platform using **user focused enhancements**, analytics, and performance optimization.
- Leveraged **Hangfire** for background jobs like automated reports, notifications, and payment reconciliation.

Additional Notes:

The platform contains complex logic for AI based recommendations, dynamic product indexing, and multi-tenant store management. I'd be happy to explain these systems in more detail during a discussion.

February 2024 – November 2025

Project Name: Cash Crusaders User Dashboard

Domains: <http://devdashboard.cashcrusaders.co.za>

Description

A full rebuild of the user dashboard to improve how orders, loans, and laybys are managed. The new system replaced an older version that often crashed and required heavy maintenance.

Key Contributions

- Set up and structured the frontend using Angular 16.
- Built core features for Accounts and Layby (frontend & backend).
- Integrated OAuth2 authentication with IdentityServer4.
- Developed RESTful APIs with .NET 7 and Dapper for fast data access.
- Worked closely with designers and devs to align UI with functionality.
- Containerized the app with Docker and helped set up CI/CD pipelines.

Key Achievements

- Delivered a stable, scalable dashboard to replace the unreliable legacy system.
- Significantly reduced maintenance needs, freeing up dev time for other priorities.
- Helped store staff across South Africa manage loans and laybys more efficiently.
- Simplified the loan process, making it more accessible and user-friendly

August 2022 – June 2023

Project Name: Cash2Cache

Domains: <https://paysolutions.co.za/cash2cache> | <https://www.cash2cache.co.za>

Description

Cash2Cache is a fintech platform designed to streamline cash collection and management processes for businesses, ensuring secure and efficient handling of physical cash. The system integrates with in-transit cash operations, user safes, and various hardware devices such as money counters and automated safes, providing accurate tracking of cash from source to collection points.

Key Achievements & Responsibilities

- Contributed to feature development and system enhancements under guidance from senior management, working as a junior developer.
- Built features to **track cash collections** from user safes to in-transit collection points, improving security and operational transparency.
- Developed and integrated **hardware interfaces**, including **money safes and cash counters**, using available APIs to automate and validate cash handling processes.
- Worked on the fintech platform's **frontend and backend**, using **PHP, Slim Framework, Angular, Ionic**, and **Docker** for containerized deployments.
- Collaborated with the team to deliver secure, reliable, and maintainable features for daily cash operations.

- Supported testing and deployment processes, ensuring features worked seamlessly across devices and platforms.
